Summary

Frontend Engineer focused on building high-performance, accessible web applications with Svelte/SvelteKit, including AI-assisted and AI-evaluated systems. Experienced in translating complex systems into intuitive interfaces, developing design systems, and partnering closely with product/UX teams. Strong track record shipping production software across blockchain, SaaS, smart-infrastructure platforms, and e-commerce. **Open to B2B product roles and contract engagements.**

Highlights: Contributed to AI-driven code agent training • Supported €3.5M tokenized-bond launch • Delivered sub-800ms analytics platform • Contributed to Capella's React to Svelte migration with unified UI + major features (23% YoY growth)

PROFESSIONAL EXPERIENCE

Magic   August 2025 to November 2025
AI Training Engineer (Code Quality)

- **Reviewed and annotated frontend code** to support the training and evaluation of AI-driven code agents, with a focus on Svelte and modern JavaScript frameworks.
- **Identified bugs, architectural issues, and quality improvements** through detailed, standardized code review annotations.
- **Collaborated in calibration and workflow refinement** to ensure consistent evaluation standards and high-signal feedback in an async, distributed environment.

Dusk   October 2023 to June 2025
Product Frontend Engineer

- Rebuilt the open-source **Dusk Block Explorer** in SvelteKit – **sub-800ms loads**, real-time analytics, new account/provisioner flows, and fully refreshed UI.
- Contributed to the **Dusk Web Wallet**, integrating privacy-preserving in-browser tech and zero-knowledge proof flows.
- Built and branded the open-source **Dusk documentation** using Astro/Starlight for community and internal use.
- Built the front-end for **BWRE Capital's tokenized bond platform** (KYC/AML + wallet flows) – **supporting a €3.5M Italian tax-credit bond sale** and contributing to the Dusk ecosystem's first major RWA use case.

ICS Sustainable Solutions   January 2025 to June 2025
Product Frontend Engineer

- Designed and delivered the SvelteKit front-end architecture for a **locking-system configurator** within a major e-commerce overhaul.
- Created a **custom design system** now used across the engineering team.
- Delivered **WCAG-compliant, localized UX** (EN/DE) with integrated contextual help and multi-round user feedback cycles.

Couchbase   July 2022 to September 2023
Product Frontend Engineer

- Helped transition **Capella (DBaaS)** from React to Svelte with consistent UI patterns and improved performance.
- Built front-end features for **Capella on Azure** (App Services, Private Link) enabling secure enterprise connectivity.
- Improved UX across Data Tools, replication workflows, and SSO – contributed to Capella's **Best Cloud Data Management Solution** award and **23% YoY revenue growth**.

CORE SKILLS

Svelte/SvelteKit, TypeScript, React, Node.js, Tailwind, Accessibility, Performance, SSR/SPA/Edge Rendering, Core Web Vitals • Playwright, Cypress, Vitest, Storybook, GitHub Actions, CircleCI, Datadog • Figma, Design Systems, Prototyping, i18n • REST, GraphQL, WebSockets, OpenAPI • PostgreSQL, CouchDB • Cloudflare, Vercel, Docker, AWS/GCP/Azure, OAuth2/SSO

EDUCATION

BEng Software Engineering (First Class, 1st in Cohort), University of Sheffield, 2021
